

Tcheu Siong born 1968, Laos

Lives and works in Luang Prabang, Laos

Tcheu Siong describes the characters in her artworks as emerging from dreams and visions, the zones between consciousness and dreaming. She believes that dreams are the path to another world, a world that she obeys because it elucidates this one. Her artworks explore the connections between a woman, her imagination, her world, her childhood, her demons and her aspirations. With her scissors, thread and ties, she makes these spirits, gods and ghosts conform to her will, making them part of the world which 'nourishes' her.
